

Australian Clays

Please read the disclaimer on the last page of this document before using this product.

What is it?

We offer seven different varieties of Australian clay for use at the spa, in the home, and in beauty products.

How does it work?

Clay has the ability to draw out impurities from the skin, while offering the nutrient quality of the mineral compositions it contains.

Beige (See also our <i>Kaolin Facial Scrub</i> , a fine white clay)	Kaolin	This gentle clay detoxifies body and face, absorbing and removing impurities, great for oily complexions. It stimulates circulation of the blood and lymph systems, and used in cellulite treatments, and may be used on all skin types.
Midnight Black	Iron Oxide	A non-toxic mineral with cleansing and conditioning agents for use in hair products for dark hair. Having larger particles, it is used in spa wraps.
Ivory	Kaolin	The most gentle of these clays, this has a very mild, nurturing action that is good for use on babies and the elderly and on those with sensitive skin.
Olive Green	Kaolin	This is the strongest of the clays for detoxification. Beneficial for acne-prone and oily skin, it helps to rebalance oil production, and aids in repair of scar tissue. It is ideal for body wraps after pregnancy, as it helps reduce cellulite or stretch marks.
Pastel Pink	Kaolin	Extremely gentle, this offers ultimate hydration and skin firmness to refine delicate lines, moisturize, and improve the overall texture of the delicate skin; perfect for balancing the most stressed and sensitive complexions.
Reef Red	Kaolin	When blended with Kaolin, it gives skin the wonderful healthy glow. It helps to replenish and regenerate the epidermis to create soft and healthy glowing skin. The rich color can also be used in organic hair coloring, giving natural ginger and red colors that are permanent.

NEW DIRECTIONS

A R O M A T I C S

Washed Blue	Bentonite	Derived from weathered volcanic ash, this clay can be used to wash away the impurities used in the treatment of oily and problematic skin. It regulates sebum flow, cleanses hair follicles, and dissolves impurities on the skin.

Recipe:

Red Highlights Conditioning Treatment, and Shampoo

Mix ½ t. of Australian Red Reef Clay into ½ c. conditioner, and paint hair with a beautician's colouring brush. Cover with shower cap for 40 minutes, then rinse out thoroughly. If hair is too oily or limp after rinsing, wash with a little shampoo (also using ½ t. to 1 t. clay to ½ c. shampoo). You may also use this shampoo for ginger tints or copper blonde tints, and boost it with the conditioning colour treatment.

Tips:

- This should rinse easily off the skin, but it may stain the shower liner and caulking.
- This is excellent for those who are sensitive to chemical hair colorants.
